

STEEL BAR CUTTING MACHINES

SC40 / SC50

These machines are widely used in the construction sites and reinforcing steel bar factory extensively

Features

- Main body is solid high quality cast steel reinforced in high stress areas.
- Attractive look design and colour.

Technical Specification

Model		SC40	SC50
Weight		400kg	530kg
Overall Dimension		1300x550x740	1485x615x740
Max. Cutting Diameter of Bar	A3	40mm	50mm
	A5	36mm	40mm
Continuous Cutting		32r/min	32r/min
Power of Motor		3kw	4kw

STEEL BAR BENDING MACHINES

SB40 / SB50

These machines are widely used in the construction sites and reinforcing steel bar factory extensively

Features

- Automatic / Manual Bending.
- Angels can be set by moving pins into holes along the turntable edge.

Technical Specification

Model		SB40C	SB50
Weight		320kg	380kg
Overall Dimension (mm)		810x780x840	810x780x840
Max. Bending Diameter of Bar	A3	40mm	50mm
	A5	36mm	40mm
Rotation Speed of Working Disc		12r/min	11r/min
Power of Motor		3kw	4kw
Bend Control Way		Automatic / Manual	Automatic / Manual
